Safety Message

1. Incident Name: Gold King Mine Release	2. Operational Period: Date From: 8/15/15 Time From: 7:00 am	Date To: 8/17/15 Time To: 7:00 am
Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: As personnel continue to work the incident fatigue, complacency, and stress will continue to increase. Awareness of surroundings, focusing on one task at a time, taking breaks as needed, and an increased awareness of supervisors is critical to staying safe. Please remember to follow protocols, policies, HASP's, and best practices. Ensure proper PPE is worn when required and decon properly after use. Anyone visiting the mine site is required to wear at minimum safety shoes, a hard hat, safety vest, and protective eyewear. Review MSDS sheets prior to handling any hazardous material. If you need additional PPE see your supervisor or the safety officers. Be careful of footing when in the field taking samples, PFD's are required when within 6' of the river. If new to the area the altitude can affect your health and endurance. The use of sunscreen, taking frequent breaks, and staying hydrated can reduce the effects. While you do it every day driving is probably the most dangerous thing you will do today. Please watch for wildlife, avoid distracted driving (texting and talking), wear your seatbelt, and obey all traffic laws. Share driving duties with co-workers when possible. If driving long distances take breaks, get out, stretch, and walk around. Slow Down! You aren't late if you arrive safe! Please report any accident, injury, or illness to the safety officers. Also report near misses, lessons learned may save someone else in the future.		
4. Site Safety Plan Required? Yes Approved Site Safety Plan(s) Located At: Gold King Mine (mine operations), Combined water & sediment sampling health and safety plan is under development (8/11/15-EPA IMT SO arrival pending continued work)		
5. Prepared by: Name: Jason Nakatsu, Paul Hollar Position/Title: SO, SOF3 Signature:

Detailed Forecast

Today

Isolated showers and thunderstorms after 2pm. Mostly sunny, with a high near 88. Calm wind becoming west around 5 mph in the afternoon. Chance of precipitation is 10%.

Tonight

Partly cloudy, with a low around 56. West wind around 5 mph becoming north northeast after midnight.

Saturday

Isolated showers and thunderstorms after noon. Mostly sunny, with a high near 87. North northeast wind 5 to 10 mph becoming west southwest in the morning. Chance of precipitation is 20%.

Saturday Night

A 10 percent chance of showers and thunderstorms before midnight. Partly cloudy, with a low around 56. West northwest wind 5 to 10 mph becoming north northeast after midnight.

Sunday

A 20 percent chance of showers and thunderstorms after noon. Mostly sunny, with a high near 88. Light and variable wind becoming west 5 to 10 mph in the afternoon.

Sunday Night

A 10 percent chance of showers and thunderstorms before midnight. Partly cloudy, with a low around 56.

Monday

Mostly sunny, with a high near 86.

Monday Night

Partly cloudy, with a low around 55.

Tuesday

A slight chance of showers and thunderstorms after noon. Mostly sunny, with a high near 85.

Tuesday Night

Partly cloudy, with a low around 53.

Wednesday

Sunny, with a high near 82.

Wednesday Night

Partly cloudy, with a low around 51.

Thursday

Sunny, with a high near 82.

Government Field Notes

What are you doing?

On August 5, the Gold King Mine released water that was held above the mine tunnel, spilling about 3 million gallons of mine waste into Cement Creek a tributary of the Animas River. Even though the majority of the mine water from the event has passed, both EPA and the Colorado Department of Public Health and Environment continue to monitor the situation by sampling water and sediment to determine the long term course action.

Is it safe to use the river?

The data indicates that the river has returned to stable conditions that are not a concern for human health during typical recreational exposure. There will be some discoloration of the water when the sediment is disturbed, this discoloration does not pose an immediate health risk. The San Juan Basin Health Department concurs with the state health department findings, and advises that there are no adverse health effects from exposure to the water and sediment during normal recreational use (incidental or limited exposure). The San Juan Basin Health Department advises the public to avoid areas with orange sediment or discolored standing water. Further, anyone coming in contact with any orange sediment or discolored standing water should wash with soap and water.

How do I get more information?

Contract Field Talking Points

What are you doing?

I am performing environmental sampling in support of the Animas River Unified Command.

Contract personnel are free to explain standard operating procedures:

- gloves are used to preserve sample integrity, they are not required for person protection
- explain preservation steps
- explain how to sample, etc.

How do I get more information?

Update on Local Response to Gold King Mine and Animas River Impacts - Sheriff Smith Opens Recreation on the River in La Plata County

Durango, CO – The Colorado Department of Public Health and Environment has collected and analyzed sediment from the Animas River. The data show levels of contamination are below what would be a concern for human health during typical recreational exposure.

Based on this statement from the state health department, Sheriff Sean Smith has made the decision to open the river to recreational use with the attached health advisory from the state health department. Sheriff Smith said, "My primary concern is the public health and safety of our community. In an abundance of caution, with the consultation of all our partner agencies, I issued the order to close the river to recreational uses on Thursday, August 6. With the release of preliminary results from the state health department and its accompanying recommendation, I am opening our river for recreation effective Friday, August 14, 2015 at noon with the health advisory."

Sediment is just one indicator of a healthy river, and there is some level of contamination in most Colorado rivers because of past mining activities and the geology of the state. The Colorado Department of Public Health and Environment does not anticipate adverse health effects from exposure to contaminants detected in the water and sediment during typical recreational activities. The Agency for Toxic Substances and Disease Registry recommends the following recommendations are prudent public health practices regarding contact with sediments and surface water:

1. Don't drink untreated water from the river
2. Wash hands thoroughly with soap and water after contact with the sediment and surface water.
3. Avoid contact in areas where there is visible discoloration in sediment or river water.
4. Wash clothes after contact with sediments and surface water.

In addition, the EPA sediment samples collected in the Animas River from Baker's Bridge to north of Durango have been analyzed but not yet validated. EPA has done a preliminary review of the data which included a comparison to background to determine if the metal concentrations are consistent with pre-

incident levels. Metal results that exceeded pre-incident levels were subsequently compared to risk-based screening levels. These preliminary results indicate that minor exceedances of background concentrations were observed for antimony, lead, silver, thallium. However, comparison to risk-based screening values found these exceedances to be below risk screening levels.

The review and interpretation of these data was a collaborative effort that included state and local members of the unified command. Once EPA sediment data is validated, it will be posted online at:
<http://www2.epa.gov/goldkingmine>

While conditions in the Animas River today have been determined safe for recreational use, irrigation ditches that draw from the river currently are being flushed, and agricultural users should continue to exercise patience until this process is complete.

La Plata County has flushed and allowed use of some irrigation ditches for watering crops such as wheat and alfalfa. The county is systematically working to reopen all ditches. Operators of ditches that use water from the Animas River are asked to call the La Plata County Call Center at 970-385-8700 so officials can coordinate reopening of all river head gates. Flushing may cause local, temporary discoloration of the Animas River, which should clear quickly.

Gardeners who use water from the Animas River and grow leafy vegetables and root crops should call the CSU Extension office at 970-382-6463. Answers to questions are site and crop specific.

The Colorado Department of Agriculture State Veterinarian's Office is confident that water from the Animas River can be used to water livestock. "The information we have received shows that water quality levels are comparable to those prior to the spill," said Dr. Carl Heckendorf, State Veterinarian for the Colorado Department of Agriculture. "We will continue to monitor the situation and will provide updates if it becomes necessary."

Local, tribal, state and federal agencies will continue to test water and sediment routinely and will respond quickly to any potential issues.

Incident information is posted to the La Plata County website at <http://www.co.laplata.co.us/emergency>, San Juan Basin Health Department's Website at www.sjbhd.org, on Facebook at www.facebook.com/LaPlataCounty, and <http://www.facebook.com/sanjuanbasinhealth>. Data is posted to Colorado Department of Public Health and Environment website at <https://www.colorado.gov/pacific/cdphe/animas-river-spill>, at EPA's website at <http://www2.epa.gov/goldkingmine>. La Plata County has set up a call center for questions from citizens at 970-385-8700, open from 8:00 a.m. to 6:00 p.m. Southern Ute Tribal members may call the Tribal Hotline at 970-563-5025.

###

ORDER OF THE LA PLATA COUNTY COLORADO SHERIFF
TERMINATING THE USE RESTRICTIONS ON THE ANIMAS RIVER

AUGUST 14, 2015

Pursuant to the authority vested in me under C.R.S. §§ 33-13-111 and 112, I, Sean Smith, Sheriff of La Plata County, Colorado, hereby issue this Order dated August 14, 2015.

I. Background

A. On August 5, 2015, the EPA and State Division of Reclamation, Mining and Safety team working to investigate and address contamination at the Gold King Mine in San Juan County, Colorado unexpectedly triggered a large release of mine waste water into the upper portions of Cement Creek located in San Juan County, Colorado. Revised estimates are that the release contained approximately 3 million gallons of water that was held behind unconsolidated debris near an abandoned mine portal.

B. The EPA recommended that recreational users of the Animas River avoid contact with or use of the river until the pulse of mine water passed.

C. After consultation with the EPA, Colorado Department of Public Health and Environment and San Juan Basin Health Department, I determined that a hazard to human life and safety existed within La Plata County and on August 6, 2015 issued an order imposing use restrictions on the Animas River.

D. The San Juan Basin Health Department and the Colorado Department of Public Health and Environment have determined and advised me that it is safe to reopen the river to recreational use, subject to the attached list of advisements.

D. Based upon sampling data that has now been produced and in consultation with local, state and federal officials, I have determined that the threat to human life and safety has passed and that it is appropriate to terminate the restrictions put in place on August 6, 2015, subject to the attached advisements.

II. Directive

As of August 14, 2015 at 12:01 p.m., the official use restrictions put in place on August 6, 2015 shall be lifted and recreational activities on the entirety of the Animas River located within the jurisdiction of La Plata County may be fully restored, subject to the attached health advisements.

Sean M. Smith, La Plata County Sheriff

Animas River Health Advisory

The Colorado Department of Public Health and Environment has collected and analyzed water quality and sediment from the Animas River. The data indicates that the river has returned to stable conditions that are not a concern for human health during typical recreational exposure. There will be some discoloration of the water when the sediment is disturbed, this discoloration does not pose an immediate health risk.

The San Juan Basin Health Department concurs with the state health department findings, and advises that there are no adverse health effects from exposure to the water and sediment during normal recreational use (incidental or limited exposure). The San Juan Basin Health Department advises the public to avoid areas with orange sediment or discolored standing water. Further, anyone coming in contact with any orange sediment or discolored standing water should wash with soap and water.

The Colorado Department of Public Health and Environment will continue to test water and sediment routinely and will respond quickly to any potential issues. Visit the [state health department website](#) for data and updates. The San Juan Basin Health Department will remain in contact with state health department and will provide any updates and public health recommendations as necessary.

FOR IMMEDIATE RELEASE, AUGUST 14, 2015

NEWS RELEASE

City Begins Pumping

Durango, CO: As of 2:00 p.m. this afternoon, the City of Durango has resumed pumping raw water from the Animas River for further treatment. The decision to resume pumping was made after the City received the results of independent water quality tests. On August 12th, the City was notified by the Colorado Department of Public Health and Environment that the City could begin drawing water from the Animas River as needed for drinking water treatment.

During pumping, City Utilities department staff will continue to analyze water quality samples according to already established protocols to ensure the safety of the City's drinking water supply. Results of the testing will be posted on the City's website at www.durangogov.org/utilities.

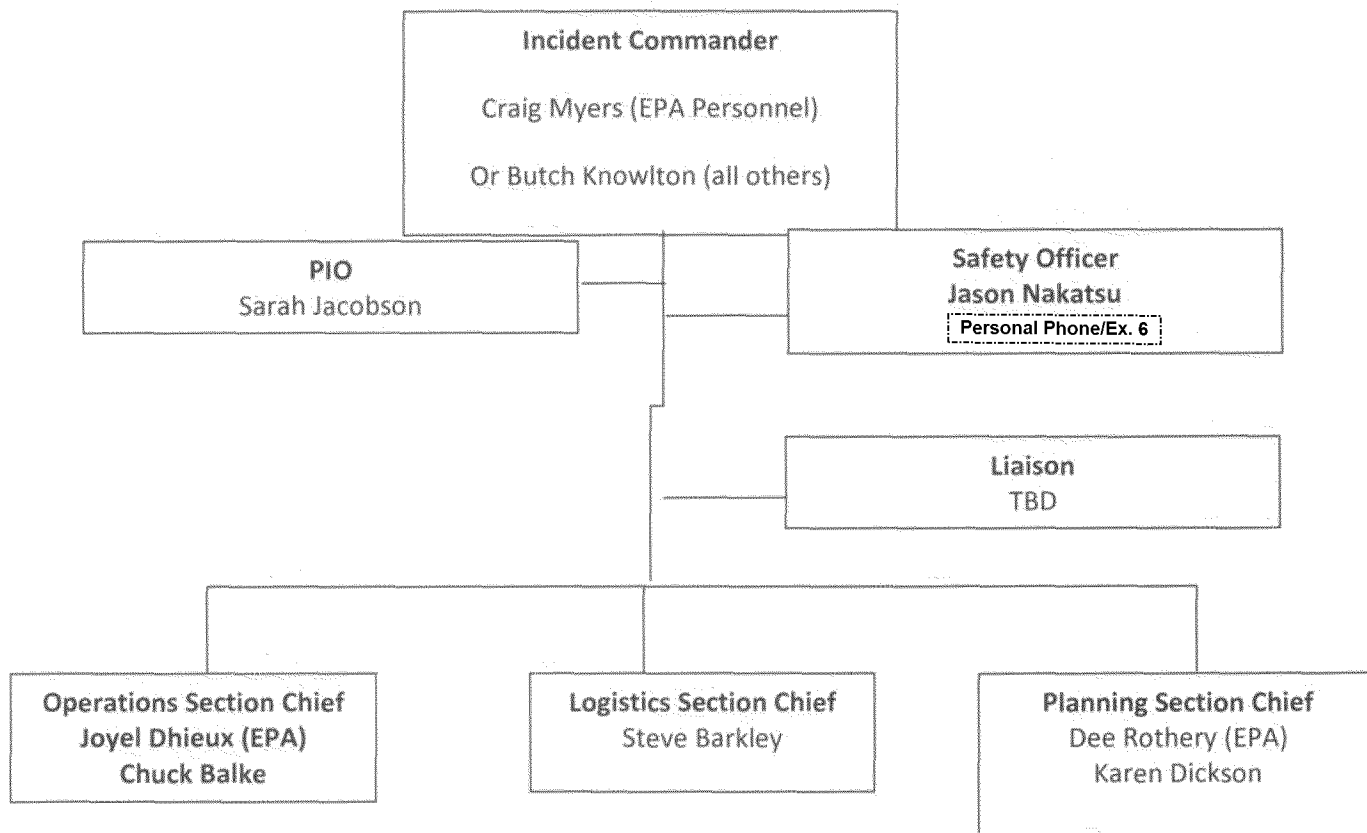

Residents and businesses can now resume responsible outdoor irrigation. "A huge thank you to our community," commented Mayor Dean Brookie. "We put out the call to discontinue outdoor irrigation and the community responded by reducing their usage by more than two million gallons a day in just 48 hours. We appreciate everyone's cooperation in helping to keep our drinking water safe."

The City will utilize a phase approach to allow the use of City water for larger irrigation needs such as the Hillcrest Golf Course, Fort Lewis College, 9-R School District, and City parks.

For more information on water saving tips, please visit www.durangogov.org/utilities.
